Tamil Nadu, India.

PROFILE

I am an Application Support Engineer and MCA graduate with a 2-year track record of ensuring software availability through technical expertise. Having resolved 500+ critical incidents with 95% SLA precision, I optimize service delivery using Python automation, Root Cause Analysis, and system monitoring. Beyond infrastructure, I engineer 3D motion-logic tools and end-to-end utilities. I align Database Management, complex code, and deployment to ensure application performance remains ***consistent***.

EDUCATION

Monolith Research and Training Labs, Chennai — Degree for AR / VR

JANUARY 2024 – APRIL 2025

Anna University, College of Engineering Guindy, Chennai — MCA

OCTOBER 2020 – APRIL 2022 - **CGPA:** 7.96

The American College, Madurai — B.Sc. Computer Science

JUNE 2016 - APRIL 2019 - **CGPA:** 6.8

T.M.H.N.U.M.H.S.S, Theni — HSC

MARCH 2016 - **Percentage**: 85.50

T.M.H.N.U.M.H.S.S, Theni — SSLC

MARCH 2014 - **Percentage:** 92

PROJECTS

Video Steganography –Technology used: Python using PyCharm.

Engineered a security utility to encapsulate encrypted video payloads within digital carrier media. Secured sensitive data transmissions by implementing robust steganographic algorithms.

GitHub: github.com/Riyasmanikodi/video-steganography

Vision-based Motion Capture –**Technology used**: Python, OpenCV, MediaPipe

Monocular Depth Estimation, architected an automated Computer Vision pipeline to infer 3D spatial coordinates from fragmented 2D video frames for real-time kinematic mapping. Optimized the synchronization of facial telemetry with skeletal rigs to retarget complex motion data into high-fidelity 3D animations, in simple MOCAP.

PROFESSIONAL DEVELOPMENT & LEARNING

- Practicing coding and problem-solving daily on LeetCode.
- Following Front-End and Full-Stack Developer on roadmap.sh
- Exploring API integration for log analysis and fault detection.
- Build sensor-less facial depth extraction tool using Python.

TECHNICAL SKILLS

Core Support Skills:

- Technical Problem Diagnostics
- Application Support & Deployment.
- Database Query Optimization.
- API Endpoint Monitoring.
- Network Security Protocols.
- Customer service & User Training.
- Root Cause Analysis & Documentation.
- Strategic Incident Management.
- Remote Support & Helpdesk Operations.
- System Administration (Windows, Mac)

Technical Proficiencies:

Programming: Python, Basic SQL, Bash Scripting.

Web Technologies: HTML5, CSS3, React.js, JavaScript.

Networking: DNS, DHCP, Firewalls, TCP/IP.

Tools and DB: Git, PyCharm, MySQL, MongoDB.

Creative: Blender, Unreal and Unity Engine, Reallusion, Adobe, Marvelous Designer.

SOFT SKILLS

Communication, Debugging, Problem-Solving, Continuous Learning, Flexibility, Team Management.

WORKING

SIFY TECHNOLOGIES - ACCEL IT.

IT Support and Administrator [2022- 24]

-Resolved a high volume of technical incidents; maintained superior SLA achievement across systems, apps, and networks.

- Orchestrated and monitored a diverse suite of critical IT assets including firewalls, DNS, and provisioning tools.

- Automated internal workflows and significantly enhanced helpdesk triage velocity, drastically reducing operational overhead.

- Facilitated development with comprehensive environment staging, validation support, continuous infrastructure telemetry.

NEEYAMO ENTERPRISE PVT LTD.

Background Verify Analyst [2019-20]

- Verified 1000+ candidate profiles for global clients, achieving 99% accuracy with audit compliance.

CERTIFICATIONS & HIGHLIGHTS
